Comprehensive patient instructions are available at <https://www.dynalife.ca/patientinstructions>.

Fasting means nothing to eat or drink except water:

Fasting glucose:

At least 8 hours

Glucose tolerance test:

At least 8 hours

Gestational diabetes screen:

Fasting not required, but please do not eat immediately prior to the test or follow your physician's instructions regarding fasting.

Collections for ammonia, lactate, several coagulation tests on the AHS Hematology Specialty Requisition (including lupus anticoagulant) and other less commonly ordered tests can only be done at a hospital.

Please see the on-line test directory at <https://www.dynalife.ca/testdirectory> for complete information.

Privacy Statement

The personal information on laboratory requisitions and any medical data subsequently developed is collected to provide medical services.
